

TIGER® MILL SCALE WHEELS

NEW HIGH-PERFORMANCE SOLUTION FOR REMOVING TOUGH MILL SCALE

Removing mill scale is crucial to the strength and integrity of carbon steel welds and helps ensure the proper adhesion of surface coatings. Abrasive blasting and chemicals are effective, but they are also messy, time-consuming, and expensive. Now, there's a faster, easier way to remove tough mill scale with targeted precision.

Weiler Tiger mill scale wheels are designed to quickly and efficiently remove mill scale from hot-rolled carbon steel. They will maximize removal rates, increase productivity and operator comfort, deter gouging, and safeguard the quality of critical welds.

HIGH PERFORMANCE MILL SCALE GRINDING WHEELS

STEEL / METAL **TIGER ZIRC** / Fast Cut & Long Life

Dia.	Thickness	Grade	Max. RPM	Std. Pack	Item #
4-1/2"	1/8"	MILL30T	13,300	10	58086
5"	1/8"	MILL30T	12,200	10	58087
6"	1/8"	MILL30T	10,200	10	58088

TYPE 29
5/8"-11 Hub

This new line up features:

- **2.0 formulation** greatly increases wheel life
- **Studded design** grinds efficiently and resists loading
- Self-sharpening zirconia alumina grains deliver a **fast cut rate for the entire wheel life**
- Type 29 wheel shape ensures **full surface contact and deters gouging**
- QR code provides **quick access to important safety information**
